I am studying for a master's degree in Computer Science, as my ambition is to work on helping to develop life-changing technologies. My desire to tackle complex problems combined with my ability as a mathematician and programmer makes me ideal on a team. Alongside my studies I aim to utilise my time at University to play a full and active role in other opportunities that help others and me reach their goals.

Key Skills

- Motivated programmer who self taught HTML, CSS, JS, PHP, Python and Ruby
- Essential database management skills
- Design skills using Adobe Photoshop
- Key understanding of social media platforms Facebook, Twitter, Google+, LinkedIn & Tumblr
- Outstanding communication skills
- Proficiency in applications including Microsoft Office, Adobe Photoshop

A levels: Further Mathematics – A*

History – A

Mathematics – A*

AS levels: Computing – A

Physics - A

GCSE: A*-A grade: 9 subjects including Maths, English and separate Sciences

Hobbies & Interests

I was selected to attend the Sondeza Youth Programme in South Africa and raised money to bring back a number of underprivileged South African students whom I am still in contact with via social media. I am involved with sport, refereeing and playing 5-a-side as well as for the university ECS football team. At 15 I was captain of my team. In the last 6 months I have been involved in my sister's #SaveMeriam campaign to free a woman in Sudan sentenced to death for apostasy. I visited local schools and attended human rights lectures to promote the campaign.
